Szendrey, Julie (2007). Dissertation proposal: An empirical investigation of the familial/parental influences on the degree of frugality of undergraduate students. Paper presented at the Christian Business Faculty Association Annual Conference at Seattle Pacific University: Doctoral Showcase Scholarship Recipient.

I'm working on the Family Frugal Behaviors Scale article (Using Structural Equation Modeling with Dr. Bruce). Part of what the SEM paper is showing relates to two separate loadings in the Individual Frugality Scale - which could influence how I write the Religiosity paper and other papers.
